

Continuation of U.S.S.N. 09/661,836

Filed: December 4, 2001

PRELIMINARY AMENDMENT

Express Mail Label No.: EL 639 985 041 US

Date of Deposit: December 4, 2001

See 09/661,836
See 09/815,762

In the Claims

1. (amended) A pharmaceutical composition [for treating or preventing mucositis]

comprising an effective amount of a poorly absorbed tetracycline in the form of a polyvalent metal ion complex in a carrier for topical administration [to the mucosa] wherein less than 10% } → cl. 12 or 13

of the tetracycline is absorbed into the systemic circulation when topically administered.

15. (amended) A method for treating a patient in need thereof comprising administering to

the patient an effective amount of a poorly absorbed tetracycline in the form of a polyvalent metal ion complex in a carrier for topical administration [to the mucosa] wherein less than 10%

of the tetracycline is absorbed into the systemic circulation when topically administered.

24. (amended) A method for making a composition for treating a patient to prevent or treat

mucositis comprising making a formulation for topical administration [to the mucosa] of an

effective amount of a tetracycline in the form of a polyvalent metal ion complex which has less

than 10% bioavailability when orally administered.

Remarks

Applicants have attached a marked-up version of page 1 of the Specification, and a clean copy of page 1 of the Specification with the changes incorporated.
